THE PREFACE

Our praise to God Almighty for all His grace and guidance that have been given to us so that the proceedings of International Seminar on the theme "Midwifery Education Reform" can be realized. These proceedings contain the results of research and oral presentation with different midwifery topics presented in the oral presentation of the event.

We as the Committee should really hope that the publication of these proceedings can add references for observers and midwives to further increase research activities on the issues related to the improvement of the quality of Midwives in Indonesia. On this occasion, we deliver profuse gratitude to researchers, sponsors, invited guests, other participants, and especially Prof Helen Spiby, Dr Louis Walker, Dr. Brigitte Lynch J.M. Metha, M. Med. Ed, Directorate General of Research Strengthening and Development, Ministry of Research, Technology and Higher Education, Agency of Health Human Resources Development and Empowerment, Ministry of Health of the Republic of Indonesia, The President of Indonesian Midwives Association, and The Chairman of Midwifery Education Association of Indonesia who have contributed to the success of this activity.

EDITORIAL TEAM
OPENING SPEECH

Assalamualaikum Warohmatullohi Wabarokatuh
(May peace, mercy and blessings of Allah be upon you)
Best wishes for all of us

Let our praise be upon the presence of God Almighty, for His Grace and His gift, these proceedings of the International Seminar and Call for Paper II under the theme ‘Midwifery Education Reform’ can be published. The board of management of Midwifery Education Association of Indonesia (AIPKIND) delivers the deepest gratitude to the Research and Development Division because, with each member’s hard work and enthusiasm, these proceedings have successfully been published.

Regarding the theme that falls into ‘education reform’, AIPKIND projects its hope that a fundamental change in the system and implementation of midwifery education in Indonesia shall come to reality. As the ultimate goals of the projection, all of us hope that midwifery services and practice can transform into a better state where security, safety, and satisfaction as the whole package for midwifery service users are no longer a dream. We have been showing our best efforts to facilitate the implementation of this call for paper or other forms of academic activities in order to realize the ideals of reform in both midwifery education and services. For that, we invite the right resources in the related fields in the hope that this call for paper is not only useful for getting academic value or ‘Cum’, but also beneficial for the improvement of midwifery services and education.

These proceedings contain the results of research and oral presentations on various midwifery topics expected to be useful in order to strengthen midwifery practice/service and development. With the publication of these proceedings, we look forward to knowing that these proceedings can become invaluable references for all midwifery actors and observers. Furthermore, our series of activities, consisting of international seminar, oral presentation, and publication of proceedings, can indeed enhance the activity of research on issues related to improving the quality of Midwives in Indonesia.

We are grateful for your participation in this international seminar and oral presentation. We also put big hope into the upcoming research publication in both/either SEAJoM and/or AIPKIND’s next call for paper; therefore, your participation is highly expected. Lastly, this work can hopefully be used by those who need and useful for the profession and the entire community as the users of midwifery services, regarding the wellbeing of women, mothers, infants, toddlers and their families, and ultimately our beloved homeland.

Wassalamualaikum Warohmatullohi Wabarokatuh.
Jakarta, October 5, 2016
Midwifery Education Association of Indonesia (AIPKIND)
Chairman,

Jumiarni Ilyas, Dra., Kes.
Midwifery Education Association of Indonesia (AIPKIND) was born on October 28, 2008, together with Indonesian Midwifery Association (IBI), wishes together with educational institutions in improving the quality of education in Indonesia. At the beginning of the formation of AIPKIND was appointed caretaker 3 persons consisting of the Chairman, the Secretary and the Treasurer based in Jakarta.

In line with the high development activities and educational activities involving AIPKIND, Coordinator of the territory (Korwil) in accordance with 13 districts Kopertis DiktiKemendikbud RI that aims to facilitate the coordination of both to Trustees AIPKIND and Stakeholder Education. Korwil is supported by 42 sub Korwil to further facilitate communication. In accordance with the results of the coordination meeting of Korwil in December 2012, the proposed development Korwil be appropriate 33 province in Indonesia given the number of affordable educational institutions in every region Kopertis. Thus the number of sub-korwil also increased according to the needs of the Association.

With the rapid development of Midwifery Education Association of Indonesia, it is time for this Association to come with good governance and implement its quality. The quality of organization of education is marked by the compliance institution meet the elements set out in the standards of higher education.
